Wiederauferstehung der Value-Prämie

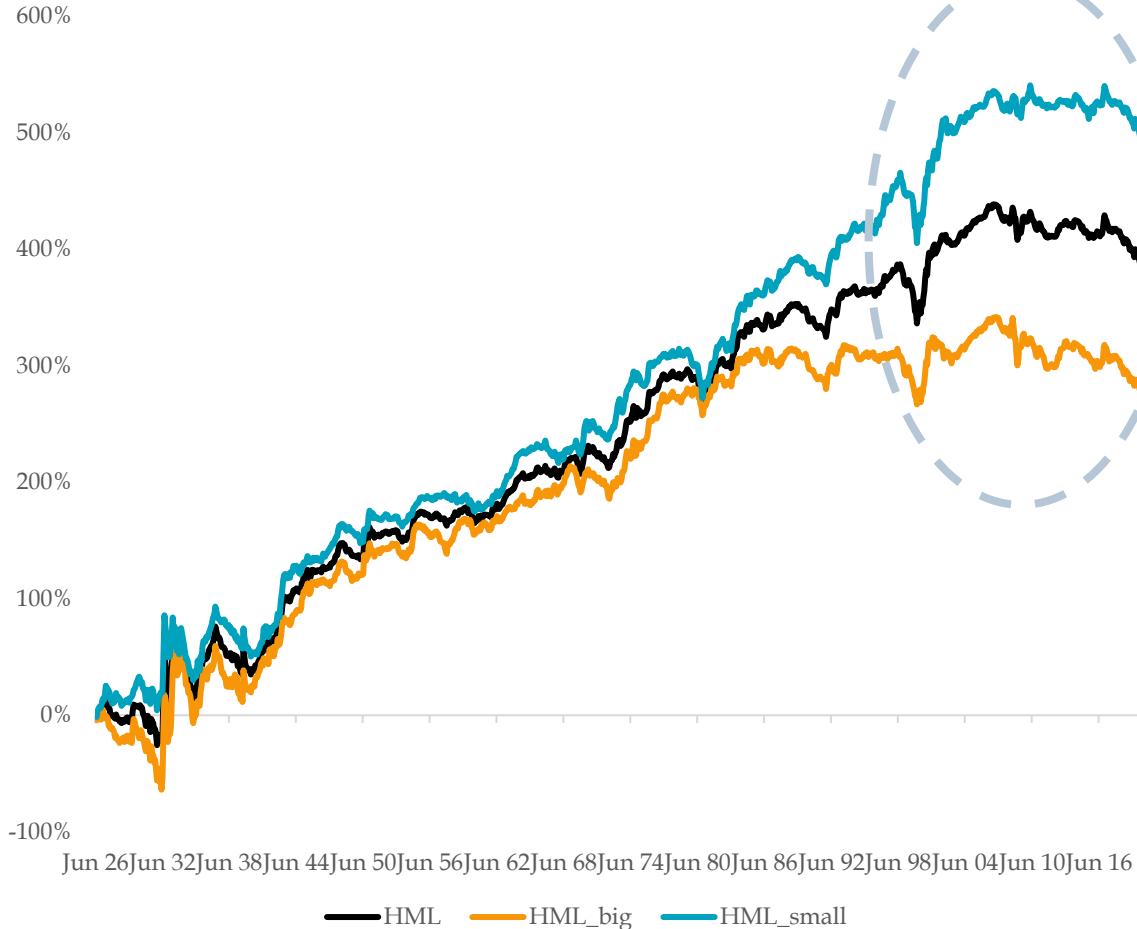

Value-Investing ist ein klassisches Konzept

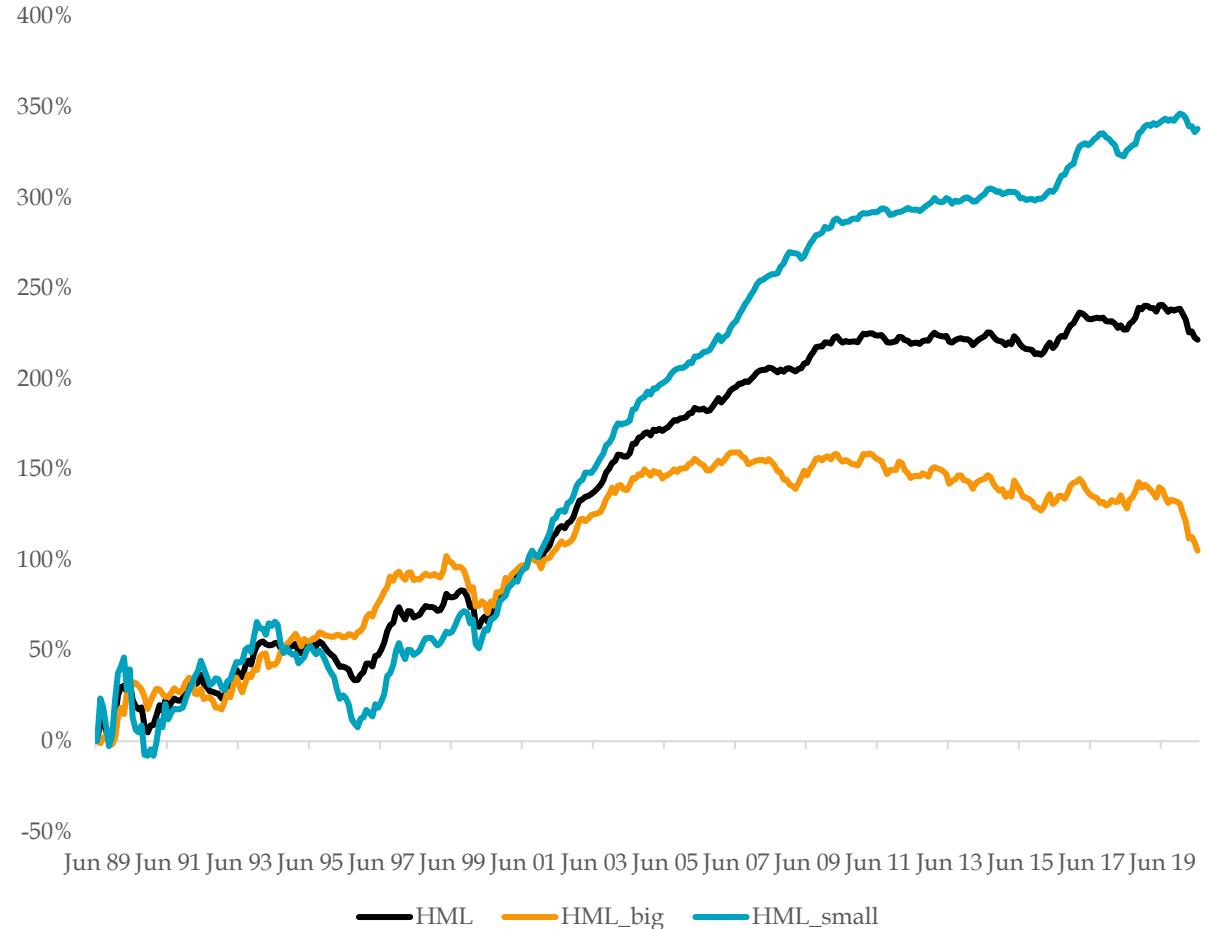

Rückblick auf Juli 2020

Der akademische Value-Faktor (hoch-minus-niedrig) ist seit seiner Einführung vor 30 Jahren eher schwach.

US (1926 – 2020)

Emerging Markets (1989 – 2020)

Source: Robeco, Kenneth French Data Library. The two graphs show the cumulated performance of the value factor (HML) that is the average performance of the value factor for big (HML_big) and small (HML_small) stocks. Portfolios are value-weighted, formed at the end of each June and rebalanced yearly. The left graph shows the performance for the US and the right graph shows the performance for Emerging Markets. The sample period for the US and Emerging Markets is July 1926 to December 2020 and July 1989 to December 2020, respectively.

Ist Value-Investing tot?

- > Die jüngste Performance hat erneut Fragen zu dieser Prämie aufgeworfen.
- > Wir zeigen, dass die Value-Prämie durch eine Anlagestrategie wiederbelebt werden kann, die etwas anspruchsvoller ist als die generische Value-Definition

Explaining the Recent Failure of Value Investing - SSRN Papers
14 aug. 2019 — Is “value dead,” or can it be resurrected? We will answer both questions by showing, based on extensive data analysis, that flaws in the.

Reports of Value's Death May Be Greatly Exaggerated - SSRN ...
2 dec. 2019 — The underperformance leads many to argue that value is dead. ... The relative valuation of the value factor falls from the top quartile of the historical distribution at the start of 2007 to the bottom percentile as of June 2020. Forthcoming, Financial Analysts Journal. Data for our iHML factor can be downloaded here.

Is Value Dead? Debate Rages Among Quant Greats From Fama to AQR

Updated: Nov 12, 2020, 3:53pm

Der erweiterte Value-Faktor: auf einem historisch attraktiven Niveau

Die Value Spanne

- > Relative Bewertung des oberen Baskets gegenüber dem unteren Basket
- > Durchschnitt der drei Kennzahlen und mehr als der Median des Bewertungsverhältnisses der gesamten Daten.
- > Die jüngsten Spreads übersteigen sogar das Niveau der Dot-Com-Ära.
- > Trotz der guten Performance ist Value immer noch attraktiv bewertet!

Source: Robeco, Refinitiv. The graph shows the composite valuation spread between the top and bottom quintile portfolios of the enhanced value strategy. The investment universe consists of constituents of the MSCI Developed and Emerging Markets indices. Before 2001, we use the FTSE World Developed index for developed markets (going back to December 1985), and for emerging markets, the largest 800 constituents of the S&P Emerging BMI at the semi-annual index rebalance (going back to December 1995). The value spread is the average spread of the book-to-market (R&D adjusted), EBITDA/EV, and CF/P. The sample period is January 1986 to October 2022.

Die erwartete Value-Rendite

- > Wir haben eine Netto-Ausweitung der Bewertungsspanne festgestellt.
- > Daher ist das strukturelle Value Alpha sogar höher als die realisierte Value Prämie:

$$\begin{array}{rcl} \textbf{8.14\%} & = & \textbf{9.76\%} \\ \textbf{Realized value return} & = & \textbf{structural alpha} \\ & + & \textbf{-1.62\%} \\ & + & \textbf{re-evaluation alpha} \end{array}$$

- > Die erwartete Rendite ist derzeit hoch:

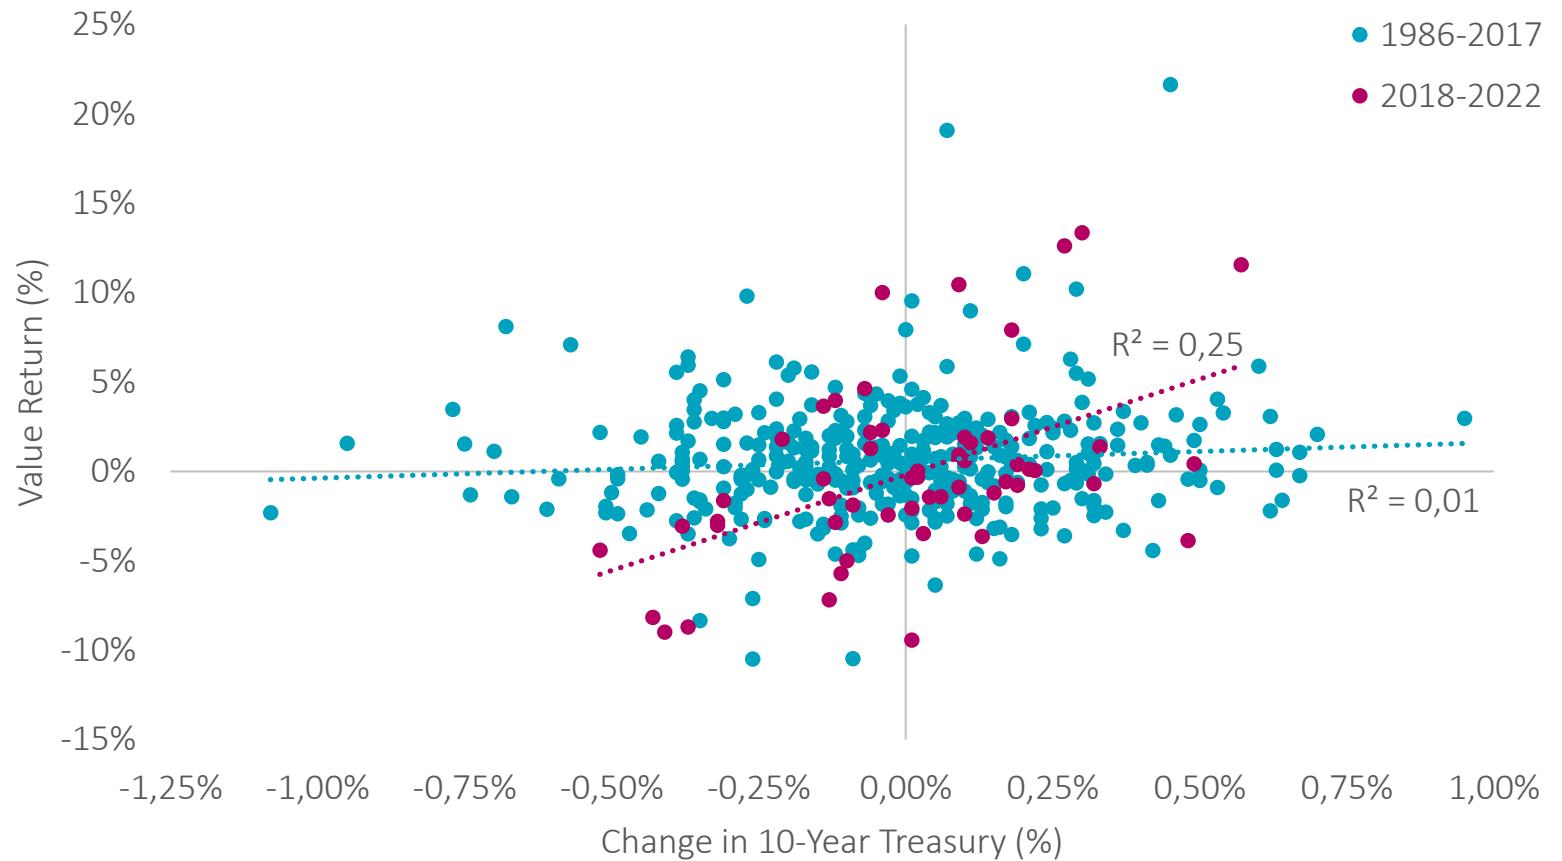

Source: Robeco, Refinitiv. The figure shows the continuously compounded annual value return over the full sample, the expected value return assuming no changes in the value spread and assuming that the value spread will go to 1.5 and 2.5 within the next 12 months. Furthermore, we show the continuously compounded annual value return for 2021 and the last 12 months. The expected value returns are estimated based on the regression from the previous slide. The investment universe consists of constituents of the MSCI Developed and Emerging Markets indices. Before 2001, we use the FTSE World Developed index for developed markets (going back to December 1985), and for emerging markets, the largest 800 constituents of the S&P Emerging BMI at the semi-annual index rebalance (going back to December 1995). The sample period is January 1986 to October 2022.

Value und Zinssätze

Zufall oder Kausalität?

- > In den letzten Jahren hat sich die Outperformance von Value-Titeln in Einklang mit steigenden Renditen bewegt.
- > Diese Beziehung ist jedoch relativ neu und scheint nicht strukturell zu sein.
- > Ähnliches lässt sich für Japan und Europa feststellen.
- > Darüber hinaus ist die Beziehung bei den jährlichen Renditen schwächer und wirtschaftlich gering.

Value premium and its sensitivity to yield changes

Source: Robeco, Refinitiv, FRED. The figure shows the returns of the US enhanced value strategy vs. contemporaneous changes in the 10-year Treasury yield. The investment universe consists of US constituents of the MSCI Developed index. Before 2001, we use the FTSE World Developed index for developed markets (going back to December 1985). The sample period is January 1986 to October 2022.

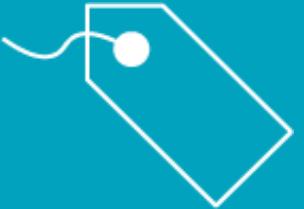

Fazit: Die wichtigsten Erkenntnisse

- > Der akademische Value-Faktor hat seit Jahrzehnten Schwierigkeiten, aber ein erweiterter Value-Faktor hat eine solide Prämie ergeben.
- > Auch der erweiterte Value-Faktor hat während der Quantenkrise 2018 bis 2020 zu leiden, was sich jedoch weitgehend durch eine extreme Ausweitung der Bewertungsmultiplikatoren ähnlich wie in den späten 1990er Jahren erklären lässt.
- > Value-Investing hat seit November 2020 ein starkes Comeback erlebt, und die aktuellen Bewertungen von Value-Aktien bleiben angesichts der sich verbessernden Fundamentaldaten attraktiv.
- > Die Value-Performance fiel in den letzten Jahren mit den Renditeveränderungen zusammen, aber wir finden kaum Hinweise auf eine strukturelle Beziehung. Auf dem heutigen Markt könnte ein Umfeld weiter steigender Zinsen jedoch ein Katalysator sein, der das derzeitige Renditepotenzial von Value freisetzt.

Important information

Important Information

Robeco Institutional Asset Management B.V. has a license as manager of Undertakings for Collective Investment in Transferable Securities (UCITS) and Alternative Investment Funds (AIFs) ("Fund(s)") from The Netherlands Authority for the Financial Markets in Amsterdam.

This document is solely intended for professional investors, defined as investors qualifying as professional clients, have requested to be treated as professional clients or are authorized to receive such information under any applicable laws. Robeco Institutional Asset Management B.V and/or its related, affiliated and subsidiary companies, ("Robeco"), will not be liable for any damages arising out of the use of this document. Users of this information who provide investment services in the European Union have their own responsibility to assess whether they are allowed to receive the information in accordance with MiFID II regulations. To the extent this information qualifies as a reasonable and appropriate minor non-monetary benefit under MiFID II, users that provide investment services in the European Union are responsible to comply with applicable recordkeeping and disclosure requirements.

The content of this document is based upon sources of information believed to be reliable and comes without warranties of any kind. Without further explanation this document cannot be considered complete. Any opinions, estimates or forecasts may be changed at any time without prior warning. If in doubt, please seek independent advice. It is intended to provide the professional investor with general information on Robeco's specific capabilities, but has not been prepared by Robeco as investment research and does not constitute an investment recommendation or advice to buy or sell certain securities or investment products and/or to adopt any investment strategy and/or legal, accounting or tax advice. All rights relating to the information in this document are and will remain the property of Robeco. This material may not be copied or used with the public. No part of this document may be reproduced, or published in any form or by any means without Robeco's prior written permission.

Investment involves risks. Before investing, please note the initial capital is not guaranteed. Investors should ensure that they fully understand the risk associated with any Robeco product or service offered in their country of domicile ("Funds"). Investors should also consider their own investment objective and risk tolerance level. Historical returns are provided for illustrative purposes only. The price of units may go down as well as up and the past performance is not indicative of future performance. If the currency in which the past performance is displayed differs from the currency of the country in which you reside, then you should be aware that due to exchange rate fluctuations the performance shown may increase or decrease if converted into your local currency. The performance data do not take account of the commissions and costs incurred on trading securities in client portfolios or on the issue and redemption of units. Unless otherwise stated, the prices used for the performance figures of the Luxembourg-based Funds are the end-of-month transaction prices net of fees up to 4 August 2010. From 4 August 2010, the transaction prices net of fees will be those of the first business day of the month. Return figures versus the benchmark show the investment management result before management and/or performance fees; the Fund returns are with dividends reinvested and based on net asset values with prices and exchange rates of the valuation moment of the benchmark. Please refer to the prospectus of the Funds for further details. Performance is quoted net of investment management fees. The ongoing charges mentioned in this document are the ones stated in the Fund's latest annual report at closing date of the last calendar year.

This document is not directed to, or intended for distribution to or use by any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, document, availability or use would be contrary to law or regulation or which would subject any Fund or Robeco Institutional Asset Management B.V. to any registration or licensing requirement within such jurisdiction. Any decision to subscribe for interests in a Fund offered in a particular jurisdiction must be made solely on the basis of information contained in the prospectus, which information may be different from the information contained in this document. Prospective applicants for shares should inform themselves as to legal requirements also applying and any applicable exchange control regulations and applicable taxes in the countries of their respective citizenship, residence or domicile.

The Fund information, if any, contained in this document is qualified in its entirety by reference to the prospectus, and this document should, at all times, be read in conjunction with the prospectus. Detailed information on the Fund and associated risks is contained in the prospectus. The prospectus and the Key Investor Information Document for the Robeco Funds can all be obtained free of charge at www.robeco.com.

Additional Information for investors with residence or seat in the United Kingdom: Robeco is deemed authorised and regulated by the Financial Conduct Authority. Details of the Temporary Permissions Regime, which allows EEA-based firms to operate in the UK for a limited period while seeking full authorisation, are available on the Financial Conduct Authority's website.
